AUGUST 9 DAY: Walk Burlington/Shelburne area

AUGUST 9 EVENING: Potluck dinner in Burlington

Each night after potluck there will be a discussion regarding activism around shutting down Vermont Yankee.

With radiating waves, a skull and crossbones and a running person, a new ionizing radiation warning symbol is being introduced to supplement the traditional international symbol for radiation, the three cornered trefoil.

The new symbol is being launched today by the IAEA and the International Organization for Standardization (ISO) to help reduce needless deaths and serious injuries from accidental exposure to large radioactive sources. It will serve as a supplementary warning to the trefoil, which has no intuitive meaning and little recognition beyond those educated in its significance.
